¹ For details regarding the general nature of directions or guidance given, please refer to annual reports.

² Following amendments to the ICAC Act in December 2016, the Commissioner revoked directions and guidance issued to public authorities in respect of 78 referrals. Directions and guidance previously issued to inquiry agencies ceased to have effect because the Commissioner no longer had statutory oversight of matters referred to an inquiry agency. Standard directions' as published within the Directions and Guidelines of the time were issued in respect of every referral of a potential issue of misconduct or maladministration in public administration to an enquiry agency or public authority. On a few occasions the Commissioner has issued additional directions to a public authority in order to ensure that the matter or a certain aspect of the matter was properly investigated.
